# 1. Theme Options

Rojo is a theme that is full of options to give you all the control you want on every single detail in your website.

## 1.1 General Settings:

These are the generic settings affecting the entire website.

### 1.1.1 Header Settings

Here are all the options related to the Header area

#### 1.1.1.1 Header Height (Value in pix)

This is used to adjust the header area height. You may need to change this in case that you are using a logo which has height of more than 137 pixels.

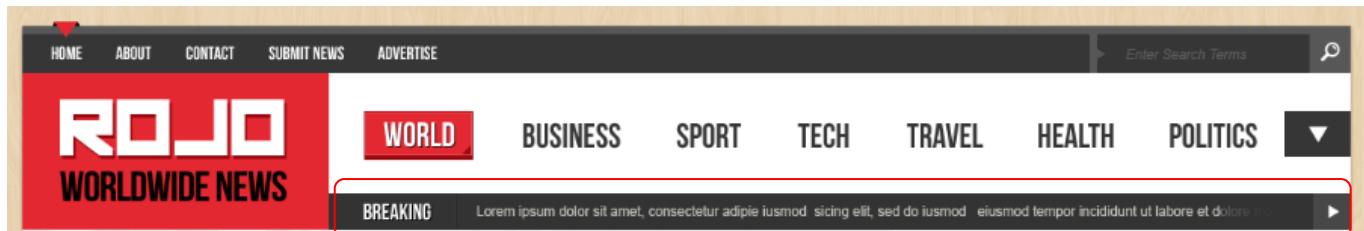

#### 1.1.1.2 Search Area (On/Off)

This is used to display/hide the search bar in the top-right area of the header.

### 1.1.1.3 Breaking News area (On/Off):

This is used to enable/disable the Breaking News area below the categories menu.

In this area you choose either to display posts or Custom text.

### 1.1.2 Footer Settings:

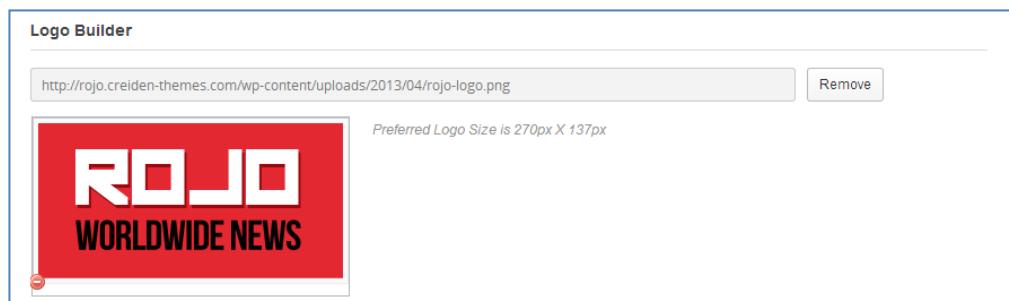

Here you can change the text that appears in the bottom left side of the website where the copyrights/trademark/etc is placed.

### 1.1.3 Logo and Favicon:

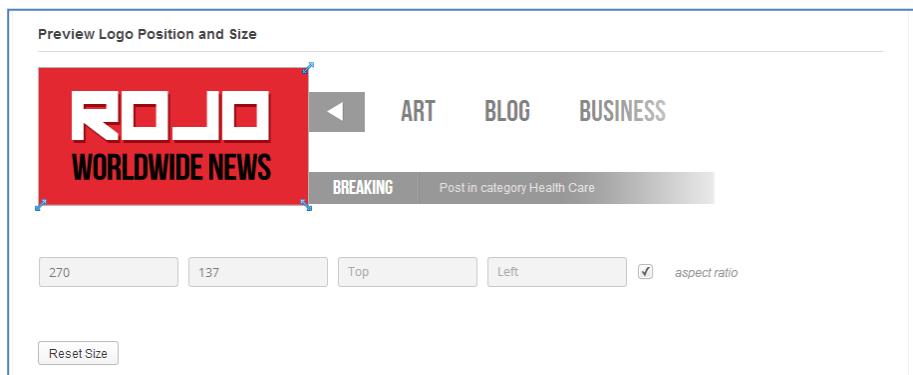

#### 1.1.3.1 Logo Builder:

To build logo:

- 1- Upload your logo image.

- 2- You can resize the logo image and drag it to wherever you want in the permissible area OR Reset size to get the default values.

### 1.1.3.2 Retina Logo:

Upload the retina version of your logo here. Its dimensions **MUST** be double of the original one and its name should be the same as the original logo but with suffix (@2x.extension).

**Ex.** If the logo's name is Rojo\_Logo.png, the Retina Logo should be Rojo\_Logo@2x.png and must be uploaded with the original logo to make sure it's in the same directory.

### 1.1.3.3 Favicon:

Favicon is the image that appears in the browser besides your website name.

***Please use .ico files only and preferred size is 16x16 pixels.***

## **1.1.4 Advanced:**

Here we list all the advanced stuff that a normal user won't regularly need to change after a demo installation.

### **1.1.4.1 Responsive:**

Enable or Disable viewing the website on mobile devices.

### **1.1.4.2 RTL Website**

If your website is a right-to-left language like Arabic, you will need to check this option to load the RTL files for your website.

### **1.1.4.3 Built-in SEO:**

Rojo has its SEO fields in it; we have generic fields for all website pages and specific meta-fields for each page separately. If the page field is empty, the generic values are applied. If the page fields are set, they will overwrite the generic values.

The form consists of two parts. The top part contains two input fields: one for 'Meta-Description' containing 'Creiden is a leading Web Development Company' and another for 'Meta-Tags & Keywords' containing 'html,code,css,psd,creiden'. To the right of these fields are their respective placeholder texts: 'Type in the meta description here to enhance your SEO Score' and 'Type in the meta keywords separated by commas "," to enhance your SEO Score (Maximum 15 words)'. Below these fields is a red button labeled 'SEO Generic Values'. The bottom part of the form is titled 'Page SEO fields' and contains three dropdown menus: 'Meta Tags', 'Meta Description', and 'Meta Tags & Keywords'.

Uncheck this option to use an external plug-in for SEO.

### **1.1.4.4 Google Analytics Code:**

If you are using Google Analytics tools to track down your website visitors and clicks, no need to install the plug-in or add the code manually to each page. Just paste the code you are given by Google here and we will add it for you ☺

### **1.1.4.5 Custom CSS Codes:**

If you have any custom style rules for any element in the website, just paste the code here and we will load it in the styles. Please note that this code overrides the styles found originally in the theme.

### **1.1.4.6 Custom Java Script Codes:**

Also, if you have any added Java Scripts you want to add to the website, just paste them here and we will integrate them for you.

#### 1.1.4.7 Login Page Logo

You will need this option to change the default wordpress logo found in your admin-panel login page. The default dimensions for this image (set by Wordpress) are 274x63 pixels.

## 1.2 General Settings:

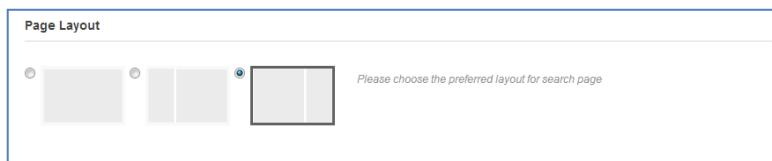

In this section, each page will have its own options.

### 1.2.1 Common Options (Blog/Tags/Search Results/Category Pages):

These pages have some common options that are found in each one of them. We will list the common options first, and then we will list the odd options.

#### 1.2.1.1 Page Layout:

You use this option to select the page layout, either without sidebar, with left sidebar or right sidebar.

*Please note that the blog page layout is controlled through the meta-option found when creating the page.*

#### 1.2.1.2 Posts per page:

Control how many posts you want to display in the meant page.

### 1.2.1.3 Display Count:

Beside each post, there is a count for Comments/Views. This option is used to show/hide this count.

### 1.2.1.4 Show Comments/Views Counts

When the “Display Count” option is enable, you will choose whether to show the number of comments for the post OR its number of views.

### 1.2.1.5 Display Date

Show/hide the post date.

### 1.2.1.6 Display Author name

Show/hide the author name.

### 1.2.1.7 Order posts by and Order Direction

You use these options to select whether to sort posts by popularity (number of views) OR by Latest. Order direction determines the direction of displaying the posts.

### 1.2.1.8 Read More Button text

Change the text of the more button beside each post

### 1.2.2 Blog Page:

The only odd option here is the category/categories you pick to be displayed in the Blog page.

### 1.2.3 Post page:

These settings are applied to the single post page

#### 1.2.3.1 Default Post image

When a post has no image assigned as featured image, the post thumbnail will be a default image of your selection.

#### 1.2.3.2 Display post image

Show/hide the post image/video/slider in the post page.

isplay author info

Show/hide the post author details in the post page.

<b>THIS ARTICLE IS WRITTEN BY</b>
 <b>admin</b> Donec lacinia magna a diam condimentum ut tempus libero scelerisque. Nullam in augue vel purus ultrices sollicitudin vitae a magna. Suspendisse potenti. <a href="#">Author Profile</a>

#### **1.2.3.4 Display Social Share**

#### **1.2.3.5 Display Views count**

#### **1.2.3.6 Display comments count**

The count in the top left area of the post

A screenshot of a blog post. At the top, it says "SPORTS POST NUMBER 1" and "14 Feb 2013 by admin in Sport". In the top left corner of the post content area, there is a small red square icon with a white speech bubble containing a '0'. This icon is highlighted with a green square. The rest of the post content is visible below.

#### **1.2.3.7 Display Related posts section**

A screenshot of a "Related Posts" section. It starts with the heading "Related Posts" in red. Below it are three thumbnail images: a landscape photo of a field, a photo of a person riding a bicycle, and a graphic illustration of two people jumping against a colorful background.

#### **1.2.3.8 Query posts by and number of posts**

Select the relation you want between the post and its related posts and how many posts you want to show.

#### **1.2.3.9 Display comments section**

Show/hide the comments area in the lower area of the page.

#### **1.2.3.10 Submit/Cancel buttons text**

The text used in the buttons shown in the comments section.

**COMMENTS****admin**

## 1.3 Home Builder:

Here we go. Please read the following few lines to understand how you will build your home-page.

First, let me illustrate that Rojo's Home page is designed upon the concept of a divided 2 home section (upper and lower). Between them resides the Twitter widget. That's simple, right? Actually no ☺ this is the main concept only. We have expanded this concept to suit everyone's needs. Let's explain it by steps to make it easier:

- 1- **Home layout option:** This gives you all the possible structure layouts for the Home page (independent from the content itself).

**Home Layout**

Preferred Layout for Home Page (Please note that you won't be able to change width of elements in the side-bar area)

- a. Pick whether you want a page separator or not and if you need it; then where do you need to use sidebars (up, down or both)
- b. If you picked a layout with sidebar, now pick the position of side bar.

**Side Bar Alignment**

Pick where do you the side bar to be positioned in Home page

- c. Now pick the sidebars you want to show in each area of the assigned areas for sidebars (upper/lower/full).

**Upper Area Sidebar**

---

First

Select the side bar you want to view in the upper area of the page

**Lower Area Sidebar**

---

Second

Select the side bar you want to view in the lower area of the page

**Full Sidebar**

---

Thirds

Select the side bar you want to view in the side area of the page

- 2- **Home Sections:** This area is where you place your home page section and select their options to get the Home page you want.

The blue buttons found there are the available sections you can use to build. Just click on any one of them to add a section into the grey area to start building your home page.

**Home Sections**

Drag and Drop one of these section to start building your Home Page. Click the Trash icon to delete section. Plus/Minus buttons to resize your section. Note that sections in the area containing sidebar are not resizable.

+ Posts Carousel
+ Home Slider
+ Vertical Area
+ Page Separator

+ Tabbed Categories
+ Selected Category
+ Masonry Posts
+ Divider
+ Advertisement

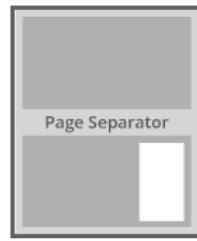

Posts Carousel
Delete
Minimize
Maximize

- Click on the arrow to show/hide this section options.
- Use the +/- icons to resize the section.
- Click on the section, drag and drop to re-position.
- Click on the trash icon to delete the section (please note that this action is irreversible; once you delete a section and click save, you won't be able to get its options again).
- **Page Separator** and **Masonry Posts** can be placed only once.

- 3- The layout you picked for the home page (in step 2) affects the resizing elements for the sections (i.e. sections beside a side-bar won't be resized)

## EX.

If you picked this layout

Your home sections will be like this:

A screenshot of a page builder interface. On the left, there is a vertical list of sections with their names and icons on the right. From top to bottom, the sections are: Posts Carousel, Home Slider, Vertical Area, Tabbed Categories, Separator, Masonry Posts, Selected Category, Divider, and Advertisement. Each section has a trash can icon, a minus sign icon, and a dropdown arrow icon.

As you see; all the sections above the separator are resizable, while the lower sections are not.

Now, we will go through all the home sections and their options:

### **1- Posts Carousel:**

This is the section where posts are shown briefly; just title, author and date.

You will be able to select either to display:

- Latest posts from selected categories (certain number of posts).
- Popular posts from selected categories (certain number of posts).
- Selected posts.

### **2- Home Slider:**

Here you will find a drop down listing all the available sliders which you created in the Creiden Sliders tab (refer to its documentation for any assistance).

### 3- Vertical Posts:

This is the area shown in the following figure. In this section you pick the categories you want to be shown in it also whether you want to show the latest posts or the most popular posts.

Business	Health	Health Care	Travel
			

**Post with Rating**

**New post by**

**Post in category Health Care**

**Travel Post number 1**

**+ | 0 | C**

#### 4- Tabbed categories:

This is the area shown in the following figure. Also here you will pick the categories you want, show **List/Grid** posts (shown in figure) and how many posts for each view.

## 5- Page Separator:

This is the area shown in the following figure. You can either display your Twitter feed OR display custom text. For both cases you will control the style of the button found there.

*In case of Custom text, leave the button text field empty to disable viewing the button.*

If you are willing to use the twitter separator, you will need to update the Widget

API Keys:

- Open js/twitter/index.php
- You will find these lines:

```
// Your Twitter App Consumer Key  
private $consumer_key = 'PqQZZhBEtRebTKazfTnb9A';  
  
// Your Twitter App Consumer Secret  
private $consumer_secret = 'fsj0M7MFJcQuEH9IH3zVNFvmbDpt8Pi3YbbUHH2xb28';  
  
// Your Twitter App Access Token  
private $user_token = '186950725-Bk8cSD5c2Vi2RH1aeraedE0jMvOonoDdkmTbPdOE';  
  
// Your Twitter App Access Token Secret  
private $user_secret = 'dFiNIXAGatvJeadCnjwV0aeqY0ks2YQJwhbwXfG1Q10';
```

Change them with your API data from twitter APP from here: <https://dev.twitter.com/apps>

## 6- Masonry Posts:

This is the area shown in the following figure. Here, you will be also able to pick the categories you want to show with certain number of posts as well.

TECHNOLOGY    SPORTS    TRAVEL    POLITICS    HEALTH    VIDEO    SIGMA    ALPHA    DELTA

## **8- Advertisement:**

This area is used to display an image as advertisement which redirects to an URL when clicked on it.

## **9- Divider:**

This is just an empty space you may use to separate content.

## 1.4 Style Options:

All website elements are here for you to edit their styles. The color templates affect only the colored elements (which are red by default). All other elements colors are not related to the theme color. Feel free to change them.

Refer to the **Appendix** section in this documentation to review the default settings in case you wanted to restore them.

## 1.5 Sidebars:

In Rojo, we gave you the ability to create sidebars as you want. Create/modify/delete sidebars to match your needs. Don't forget to click save changes after you add the desired sidebar(s).

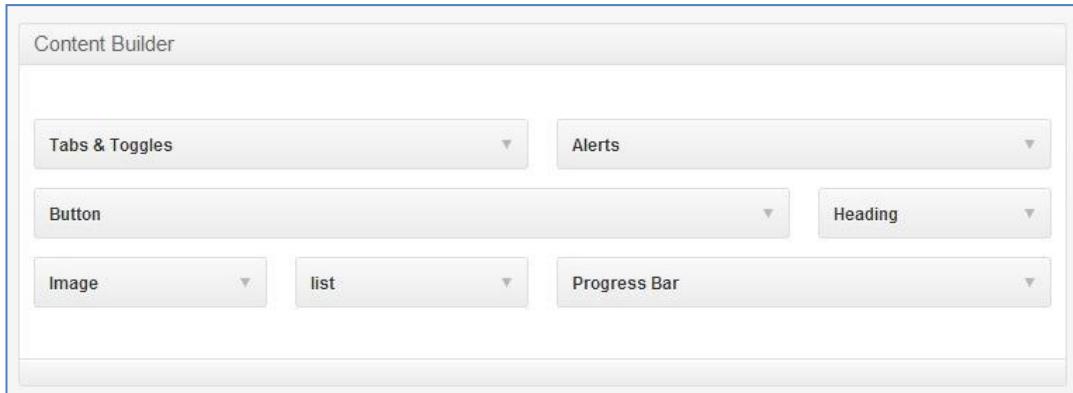

The screenshot shows a user interface for managing custom sidebars. At the top, there's a header titled "Custom Sidebars". Below it is a form with a "Sidebar Name" input field and a blue "Add" button. To the right of the input field is a note: "Add/Remove any sidebar and click Save Changes to take effect." The main area is titled "Current Sidebars" and lists three items: "First", "Second", and "Thirds", each with a red "Remove" button to its right. There are also three empty lines for additional sidebar entries.

## 1.6 Backup & Restore:

With this great addition to your wordpress theme, don't worry about losing/moving your website anywhere. Use the Backup button to save your options to the database. Click Restore at anytime to activate the saved options.

Use the import/export fields to transfer options between different Rojo themes.

## 2. Content Builder

The Content Builder aims to achieve the satisfaction of the customer by not overloading him with writing much codes or even shortcodes, just drag the elements that you want to be there and choose its options and it will be in its place, in this section we will talk about each block and how you can use this block in the page

### 2.1 Page Type

- page without content builder
- page with content builder
- Both content builder and Upper Content

From this part you can either choose to build your page without the content builder or with the content builder or with both the content builder and the normal content, default value is normal page without content builder

## 2.2 Content Builder Blocks:

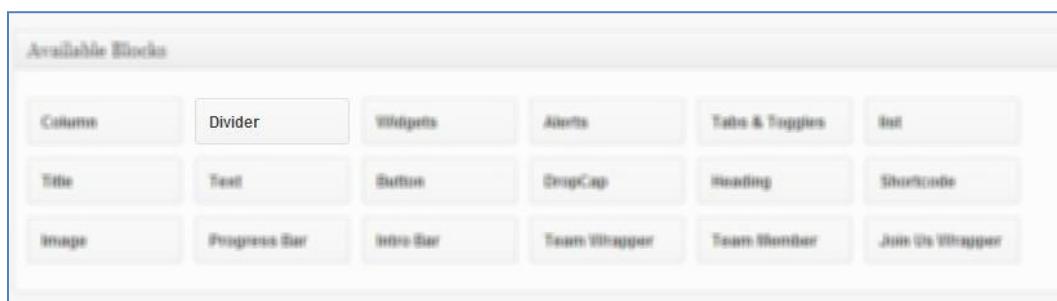

### 2.2.1 Column:

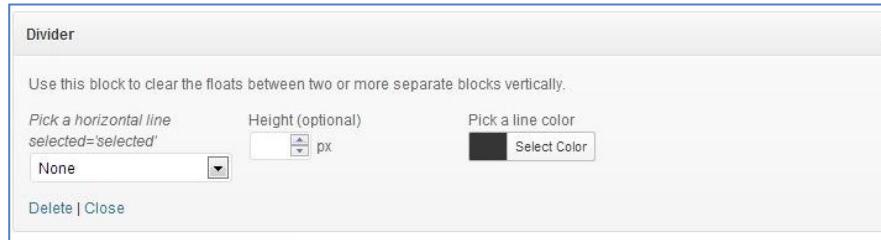

The Column is just a wrapper of elements at which you can add a part related to each other, for example if you want to add a wrapper of quarter width containing a title and a text you can use it like this:

### 2.2.2 Divider:

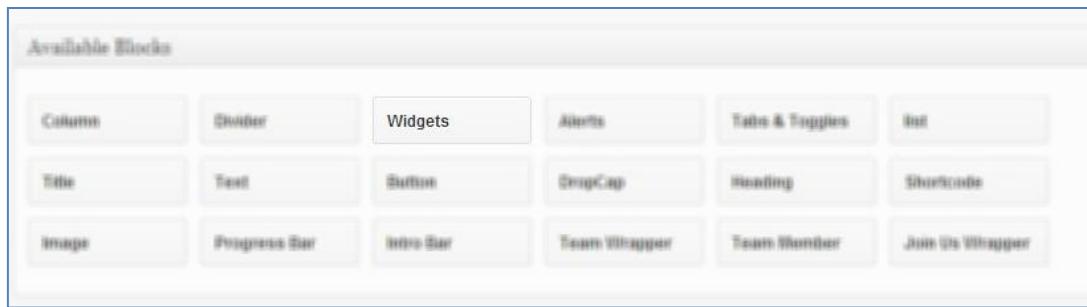

The Divider is used to add a space between the precedent element and the element that's after it and here is a list of options for it:

The options that are available in the divider are:

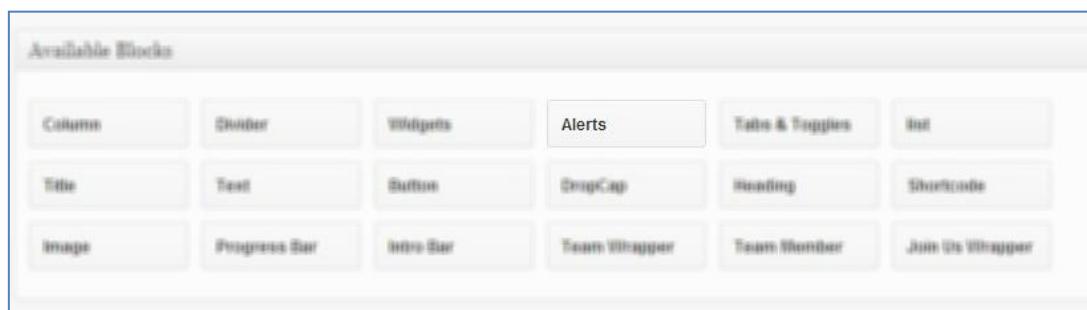

- A- Add a horizontal line in the divider -> that line can be colored from the color picker at the right also you can choose to add the horizontal line in the shape of a single line or a double line
- B- Height: which is the height of the Divider itself or the separated part that you want to add, the default number is 20px.

## 2.2.3 Widgets:

The widgets Block contains a list of the sidebars that you created from the theme options and what will appear on the page is the sidebar that you will select and the widgets that you added in this sidebar from the widgets tab

## 2.2.4 Alerts:

The Alerts Block is used to display a certain notification or warning to the user and here is a list of available options:

A screenshot of a configuration dialog for an 'Alerts : Notification' block. The dialog has a title bar 'Alerts : Notification'. Inside, there are several input fields and dropdowns:

- 'Title (optional)': A text input field containing 'Notification'.
- 'Alert Text (required)': A text area containing 'This is a notification'.
- 'Alert Type': A dropdown menu with 'selected='selected'' and 'Notification' selected.
- 'Additional inline css styling (optional)': An empty text input field.
- 'Delete | Close': Buttons at the bottom left.

Below this main dialog, there are three other collapsed sections:

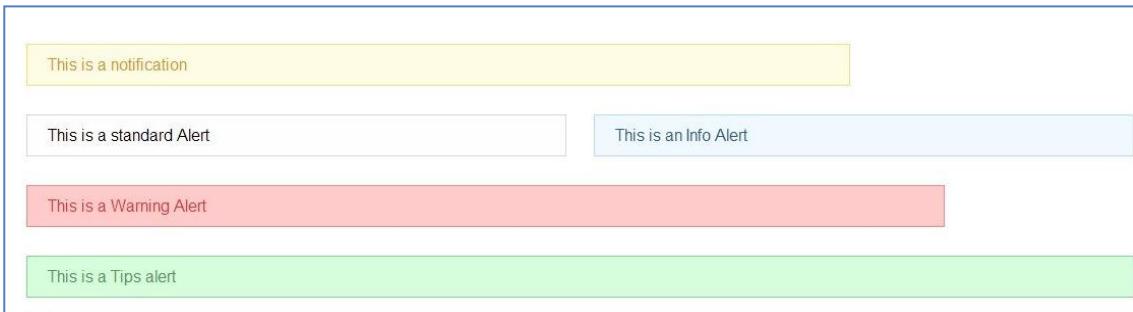

- 'Alerts : Standard'
- 'Alerts : Info'
- 'Alerts : Warning'
- 'Alerts : Tips'

- A- Title: This is the title of the alert box in the content builder only, which means that it's not rendered at the front end

B- Text: This is the content of the alert box

C- Alert Type which has a list of options: Notification, standard, info, warning, tips

C- Additional inline CSS Styling: if you want to add custom css in this place then you can add it there

## 2.2.5 Tabs & Toggles:

The Tabs & Toggles are used to generate the tabbed content or toggles or Accordion Content

Column	Slider	Widgets	Alerts	Tabs & Toggles	Ref
Title	Text	Button	DropCap	Heading	Shortcode
Image	Progress Bar	Intro Bar	Team Wrapper	Team Member	Join Us Wrapper

The Tabs & Toggles block has the following options:

- A- Add new tab and in each tab you can add a title and a text
- B- Choose the style to be Tabs or Toggles or Accordion

A screenshot of a configuration interface for the Tabs & Toggles block. It shows a list of tabs with titles: "My New Tab", "New Tab", "New Tab", "New Tab", and "New Tab". Below the tabs is a button labeled "Add New". At the bottom of the interface, there is a section labeled "Tabs style" with the code "selected='selected'" and a dropdown menu set to "Tabs". At the very bottom are two buttons: "Delete" and "Close".

Below is the shape of the tabs and the toggles and the accordion.

Note: the accordion and the toggles have the same style but the only difference is in the functionality.

**1st Tabbed Content****2nd Tabbed Content****3rd Tabbed Content****4th Tabbed Content****5th Tabbed Content****The standard Lorem Ipsum passage.**

"Lorem ipsum dolor sit amet, consectetur adipisicing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat. Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur. Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum."

Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur. Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum."

**The standard Lorem Ipsum passage, used since the 1500s**

"Lorem ipsum dolor sit amet, consectetur adipisicing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat. Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur. Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum."

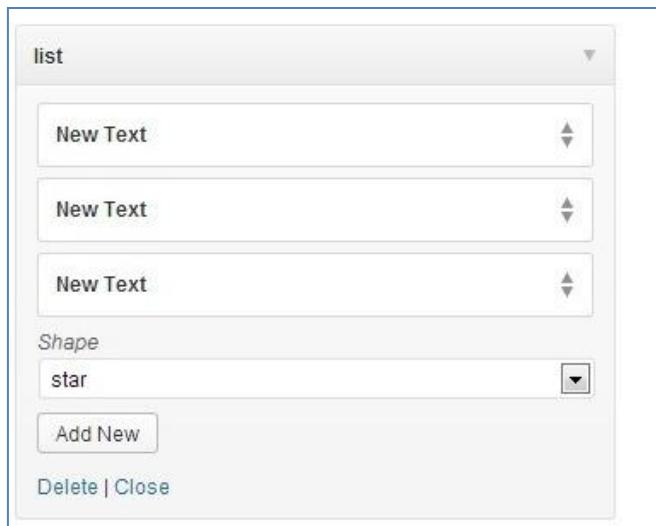

Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur. Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum."

**The standard Lorem Ipsum passage, used since the 1500s**

## 2.2.6 List:

The List is used to add list items with different shapes and renders the ul li html tags with the image that you selected, it has the following options:

A- Add a list Text

B- Choose the shape of the of the image beneath the list items, and the available lists are: star, checked, circle, and arrow

C- Add new button: adds a new list item.

And the output will be as shown below:

★ New Text	✓ New Text	■ New Text	▶ New Text
★ New Text	✓ New Text	■ New Text	▶ New Text
★ New Text	✓ New Text	■ New Text	▶ New Text

## 2.2.7 Title:

The title block is used to add a title with lines beneath it to the page

The Title has two options that need to be filled; the first one is the Title field which is used to enter the text of the title and the type of the title either full or centered.

A screenshot of a configuration interface for titles. It shows two entries: 'Title : Title full' and 'Title : Title centered'. Each entry has a 'Title' field containing the text 'Title full' and 'Title centered' respectively. Below each title is a dropdown menu labeled 'Title Type selected='selected'' with the option 'full' for the first entry and 'centered' for the second. At the bottom of each entry are 'Delete' and 'Close' buttons.

Example for the two title shapes that are rendered in the website:

## 2.2.8 Text:

The text block is used to render any text in a paragraph html tag

There is only one option needed to render the text which is the Content.

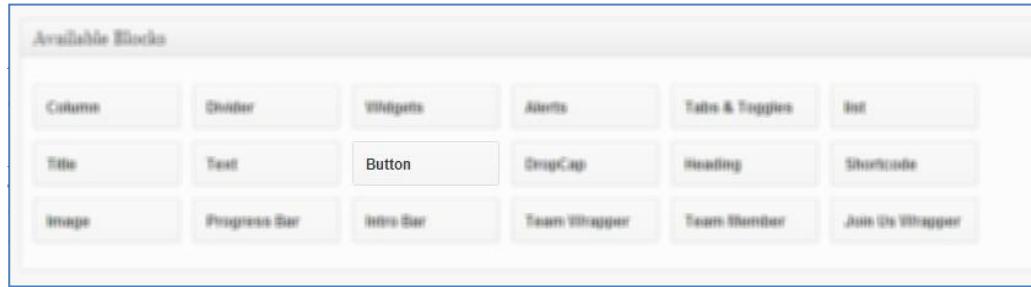

Just write your text there and you will see the below output

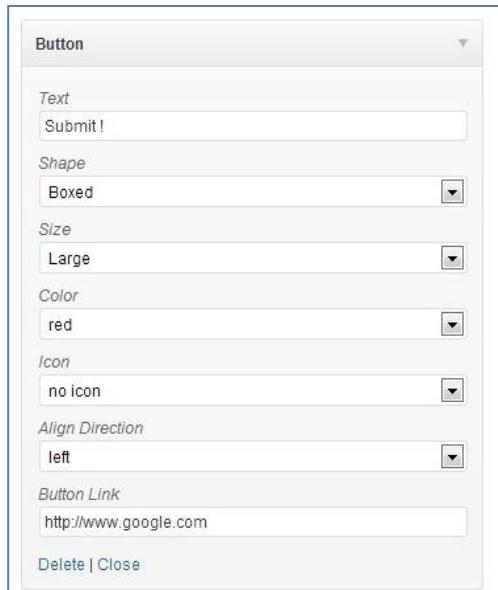

## 2.2.9 Buttons:

The Button Block is used to add buttons with all its shapes

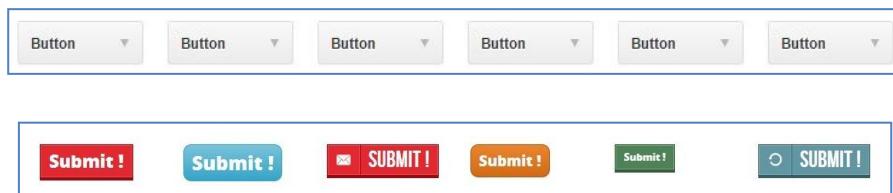

See here the button has many options to control its final shape those options are:

- A- Text
- B- Shape (Boxed or rounded or rounded light)
- C- Size (Large or Small)
- D- Color (Red, Violet, Blue and many other colors)
- E- Icon: Choose an from the set of icons available
- F- Align: Choose the Position of the button either left, center or right

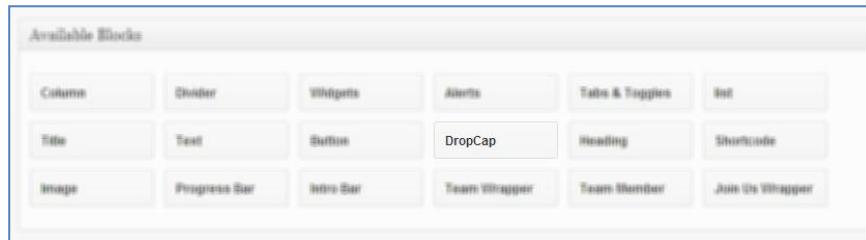

Here is a collection for the buttons that's rendered to the page:

## 2.2.10 Drop Caps:

The drop Caps gives special shape to the first character in a word.

There are two options in the Drop Cap:

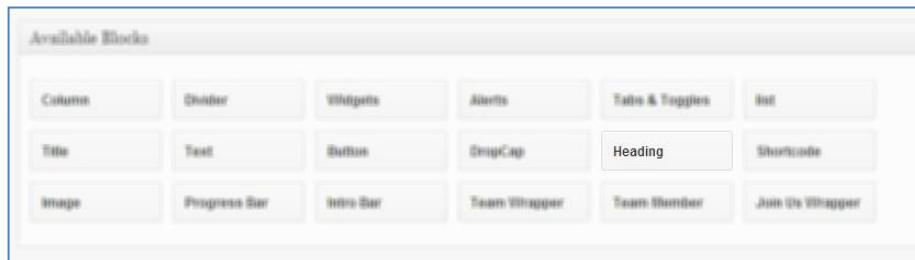

A- Content: the whole text of the paragraph

B- Shape: the style of the drop cap character (Solid or light)

Here are the two shapes of the drop cap:

## 2.2.11 Heading:

The heading is a title for a paragraph or an image but without the lines beneath it.

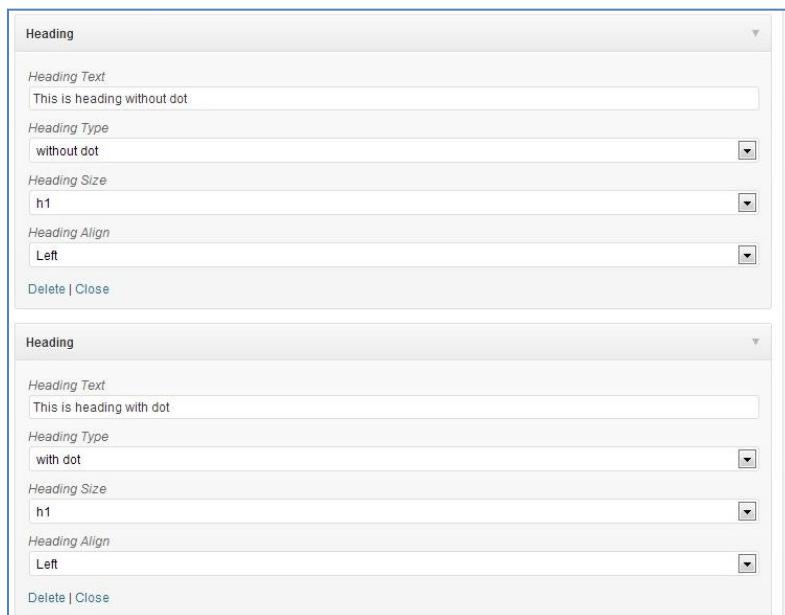

The Heading has 4 main options:

- A- Heading Text: the text of the title
- B- Heading Type: 1- with dot or without dot
- C- Heading Size: it is the header HTML Tag

**Note: please try not to use h1 more than once and h2 more than 3 times for the sake of the SEO**

- D- Heading Align: either left or right or center

And here are the rendered types of the header text after choosing the options:

**This is heading without dot**

**■ This is heading with dot**

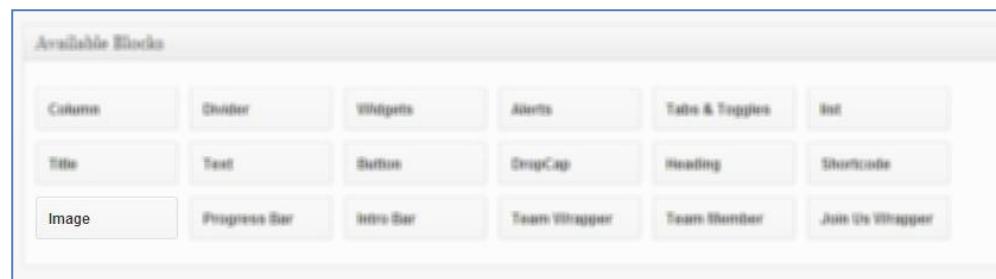

## 2.2.12 Shortcode:

The shortcode is a block used to place shortcodes

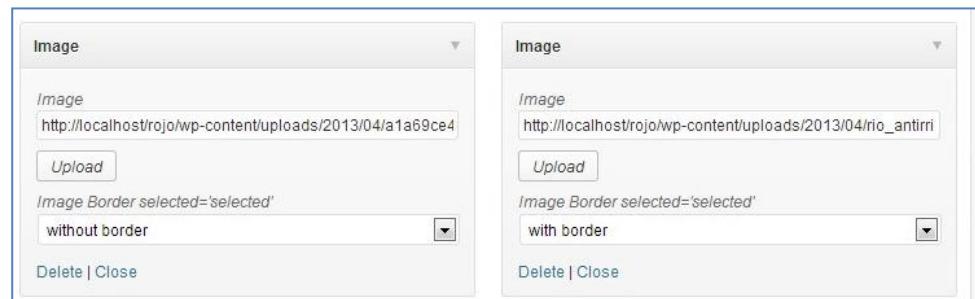

### 2.2.13 Image:

The Image is a block used to display images in your page with the size that you want; it will take the size of the block after resizing it

The image block has the following options:

- A- Upload: place to upload your images or choose from the media library
- B- Image Border: choose whether the image will be displayed with border or without border

Here is a sample for the two types of images when rendered in the front page

## 2.2.14 Progress Bar:

The Progress bar is used to display the percentage of the done part of an event like publishing the site:

The progress bar options are:

- A- Percentage of the done part
- B- Color of the progress bar

Three separate configuration panels for 'Progress Bar' blocks. Each panel has a dropdown menu labeled 'Progress Bar'.

- Panel 1: Percentage 40%, color red. The progress bar is red and filled 40%.
- Panel 2: Percentage 60%, color blue. The progress bar is blue and filled 60%.
- Panel 3: Percentage 80%, color green. The progress bar is green and filled 80%.

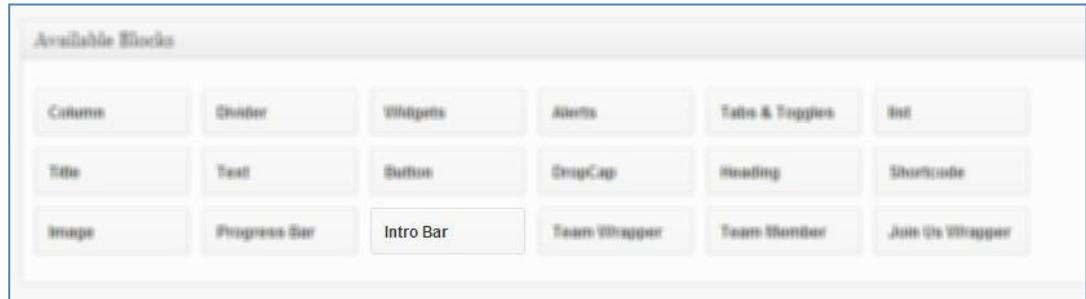

Each panel includes 'Delete | Close' buttons at the bottom.

And here three samples for the progress bars

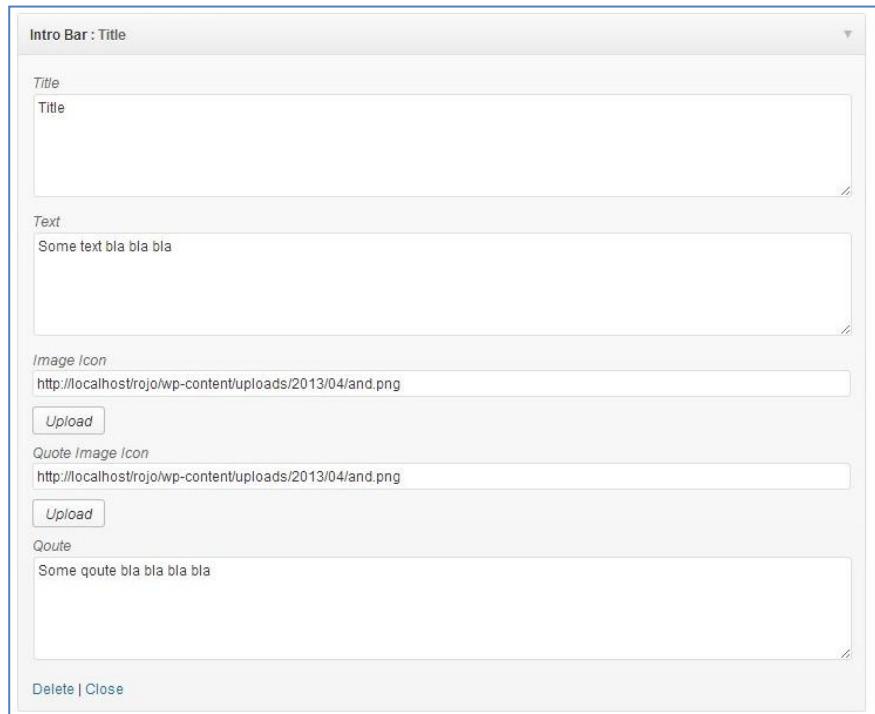

## 2.2.15 Intro Bar:

The Intro bar is the bar available in the about us page to make a certain large notification:

The Intro bar has the following options:

- A- Title: the first title of the Intro Bar
- B- Text: the text of the about us bar in the left part
- C- Image Icon: the icon on the left part
- D- Quote Image Icon: the icon on the right part of the quote
- E- Quote: the quote text

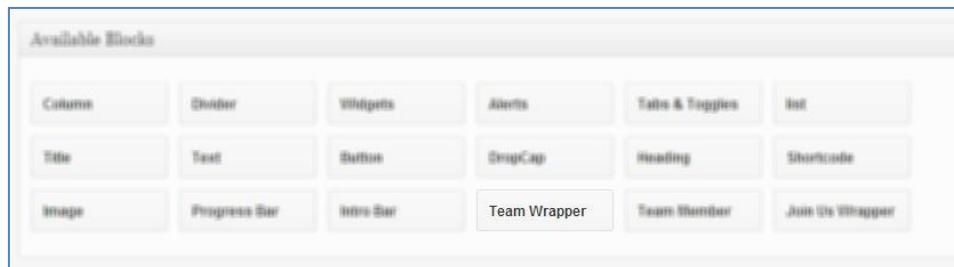

And here is the shape of the rendered quote part:

## 2.2.16 Team Wrapper

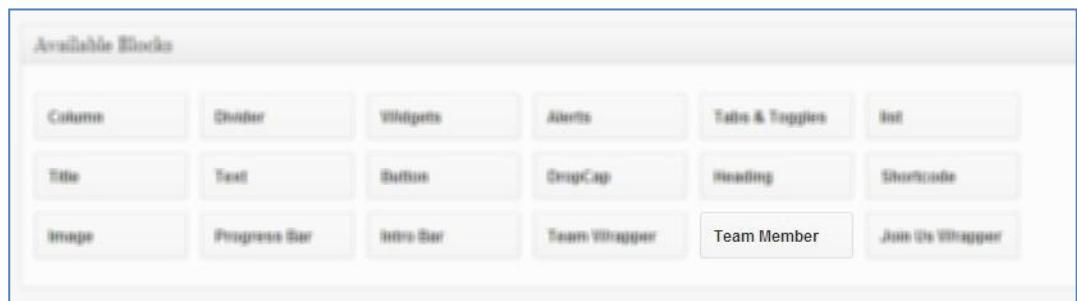

Team Wrapper is a normal column but used to wrap the team members.

Note: The team members' block can't work properly without this wrapper

## 2.2.17 Team Member:

The team Member is used to display the members of your team who worked in something, the same one is used in the about us page

The Team Member Block has the following option:

- A- Upload Image of the team member
- B- Author Name
- C- Content: Job description of the team member
- D- Social Networks Links: you have to start with http, example:  
<http://www.facebook.com>

**Team Member**

*/Image*

*Author Name*

*Content*

*Dribble Link*

*Twitter Link*

*Youtube Link*

*LinkedIn Link*

*Facebook Link*

[Delete](#) | [Close](#)

and the rendered html will be like the following in the front page

 <b>John Doe</b> <small> Lorem Ipsum Lorem Ipsum Ipsum Lorem Ipsum Lorem Ipsum Lorem Ipsum</small> <small>     </small>	 <b>John Doe</b> <small> Lorem Ipsum Lorem Ipsum Ipsum Lorem Ipsum Lorem Ipsum Lorem Ipsum</small> <small>     </small>	 <b>John Doe</b> <small> Lorem Ipsum Lorem Ipsum Ipsum Lorem Ipsum Lorem Ipsum Lorem Ipsum</small> <small>     </small>	 <b>John Doe</b> <small> Lorem Ipsum Lorem Ipsum Ipsum Lorem Ipsum Lorem Ipsum Lorem Ipsum</small> <small>     </small>
--	--	--	--

## 2.2.18 Join Us Wrapper:

It is just the frame of the following part in the about us page, you can add any block inside it whenever you want

**We are hiring.**

- Lorem ipsum dolor sit amet.
- Aliquam tincidunt mauris eu risus.
- Vestibulum auctor dapibus neque.
- Lorem ipsum dolor sit amet.

Mauris mauris ante, blandit et, ultrices a, suscros. Nam mi. **Proin viverra** leo ut odio.

**APPLY**

### 3. Widgets

Rojo contains many styled widgets that you can use either in sidebar or in footer.

**Available Widgets**

Drag widgets from here to a sidebar on the right to activate them. Drag widgets back here to deactivate them and delete their settings.

<b>Archives</b> A monthly archive of your site's posts	<b>Calendar</b> A calendar of your site's posts	<b>Categories</b> A list or dropdown of categories
<b>Custom Menu</b> Use this widget to add one of your custom menus as a widget.	<b>Google+ Badge</b> Google+ Badge	<b>Meta</b> Log in/out, admin, feed and WordPress links
<b>Pages</b> Your site's WordPress Pages	<b>QR Code Single Widget</b> QR Code Single Widget	<b>QR Code Widget</b> QR Code Widget
<b>Recent Comments</b> The most recent comments	<b>Recent Posts</b> The most recent posts on your site	<b>Rojo Advertisement</b> Rojo Advertisement
<b>Rojo Archives</b> Rojo Archives	<b>Rojo Flickr</b> Rojo Flickr	<b>Rojo Image-Text-Shortcode</b> Rojo Image-Text-Shortcode
<b>Rojo Login/Registration</b> Rojo Login/Registration	<b>Rojo Socials</b> Rojo Socials	<b>Rojo Tabs</b> Rojo Tabs
<b>RSS</b> Entries from any RSS or Atom feed	<b>Search</b> A search form for your site	<b>Slider Widget</b> Slider Widget
<b>SoundCloud Widget</b> SoundCloud Widget	<b>Super RSS Reader</b> Enhanced RSS feed reader widget with advanced features.	<b>Tag Cloud</b> Your most used tags in cloud format
<b>Text</b> Arbitrary text or HTML	<b>Twitter Widget</b> Twitter Widget	<b>Video Sidebar Widget</b> A Video Widget to display video in sidebar from various video sharing networks
<b>Wysija Subscription</b> Subscription form for your newsletters.		

**\*Notice:** Before we talk about each widget you should have read how to create a sidebar in “*chapter 1.5 Sidebars*”.

### **3.1 Default wordpress widgets:**

1. Archives widget.
2. Calendar widget.
3. Categories widget.
4. Custom Menu widget.
5. Meta widget.
6. Pages widget.
7. Recent Comments widget.
8. Recent Posts widget.
9. RSS widget.
10. Search widget.
11. Super RSS Reader widget.
12. Tag cloud widget.
13. Text widget.

These widgets are very simple, just drag them to your sidebar and you will find them styled. They don't contain complicated options and you can use them as many as you want. Refer to Wordpress Documentation for more info about these widgets.

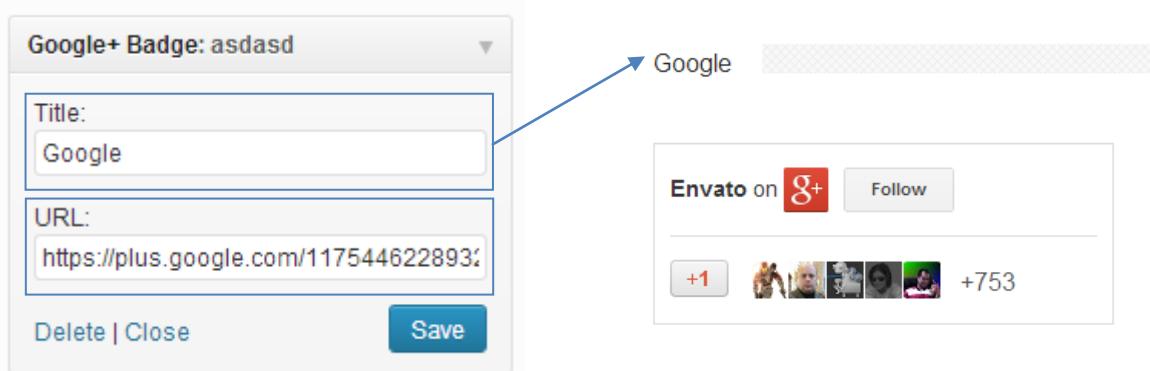

### **3.2 Rojo Advanced widgets:**

1. Google+ Badge widget.
2. QR Code Single widget.
3. QR Code widget.
4. Random Video Sidebar widget.
5. Rojo Advertisement widget.
6. Rojo Archives.
7. Rojo Flickr.
8. Rojo Image-Text-shortcode.
9. Rojo Login/Registration.
10. Rojo Socials.
11. Rojo Tabs.
12. Slider widget.
13. SoundCloud widget.
14. Twitter widget.
15. Video sidebar widget.

## 16. Wysija Subscription widget.

Now we will explain options for each widget, and how to make it work in simple steps.

### 3.2.1 Google+ Badge widget

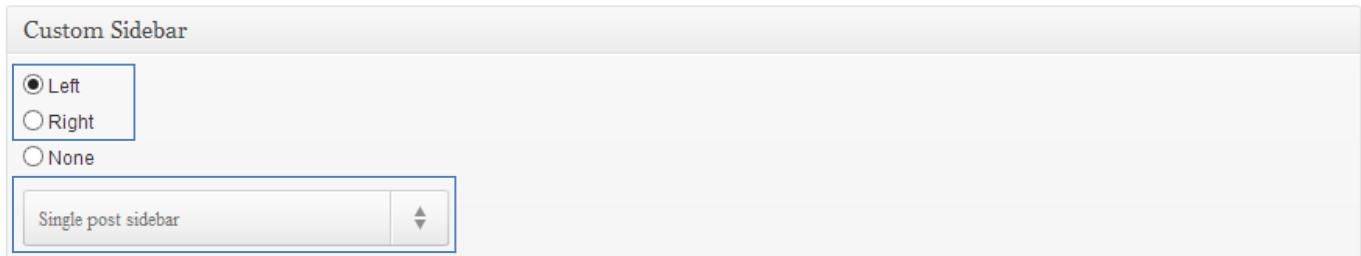

- ✓ In this widget you have options to change the title, and write your google+ account.
- ✓ You can use this widget as many as you want.

### 3.2.2 QR Code Single widget

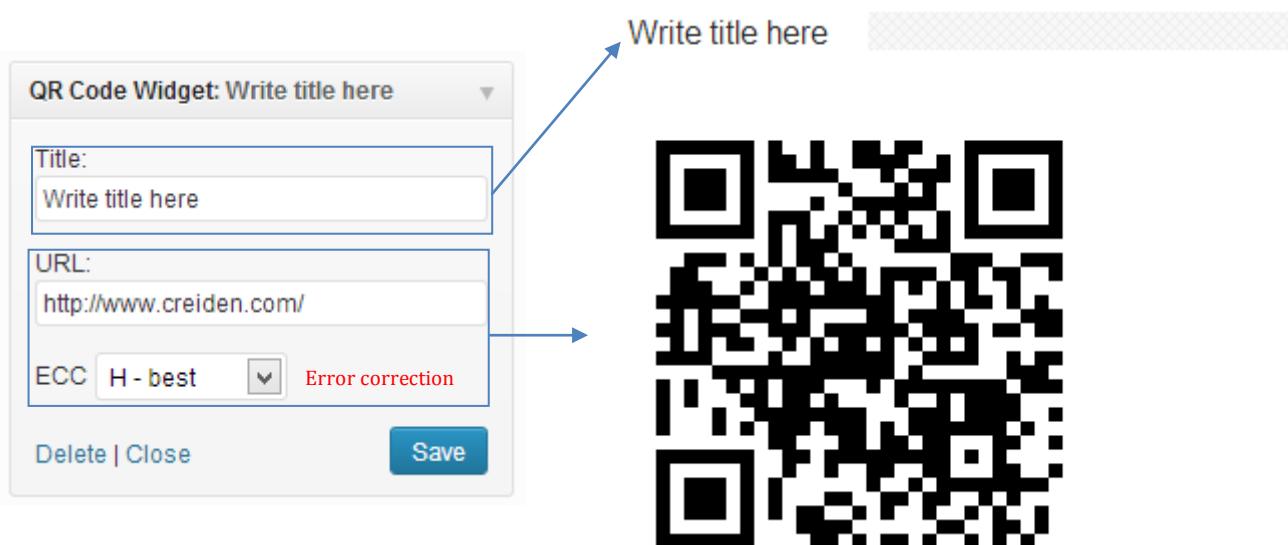

- ✓ Just drag this widget in the sidebar of single post only.
- ✓ It will show the link of this post as QR Code Image.
- ✓ You can choose the size of the QR Code image.
- ✓ And write a title.

- ✓ In the edit post page you will find a metabox at the bottom of the page choose the sidebar in which you add this widget in it.

### 3.2.3 QR Code widget

- ✓ Write the title .
- ✓ Write the link that will be QR Code.
- ✓ You can use it as many as you want in the page.

### 3.2.4 Rojo Advertisement widget

- ✓ In this widget you can add your own images and links.
- ✓ You have six input fields for image source, and six input fields for the links.
- ✓ You can use it as many as you want in the page.

### 3.2.5 Rojo Archives

- ✓ This widget displays your archives in accordion style.
- ✓ All what you need to do is just choosing the number of posts to display from each month.
- ✓ You can use this widget as many as you want in page.

The screenshot shows the configuration interface for the Rojo Archives widget on the left and its preview on the right. The configuration interface has a title 'Rojo Archives' and a dropdown menu. It includes a setting for 'Number of top posts:' with a value of '3' highlighted by a blue circle, and buttons for 'Delete | Close' and 'Save'. The preview on the right shows a red header bar with '- APRIL 2013'. Below it is a section titled 'TOP POSTS OF APRIL' with three items, each preceded by a red star icon. The first item is 'Metacafe video post...'. The preview also shows collapsed sections for 'MARCH 2013' and 'FEBRUARY 2013'.

### 3.2.6 Rojo Flickr

- ✓ Write title for the widget.
- ✓ Write the id of your flickr.
- ✓ You can use it only once in the page.

The screenshot shows the configuration interface for the Rojo Flickr widget on the left and its preview on the right. The configuration interface has a title 'Rojo Flickr: Flickr' and a dropdown menu. It includes a note: 'Note: Please Use this widget only once in page.', a 'Title:' field containing 'Flickr', a 'Flickr id:' field containing '36038586@N04', and buttons for 'Delete | Close' and 'Save'. The preview on the right shows a header 'Flickr' and a grid of eight thumbnail images from a Flickr album.

### 3.2.7 Rojo Image-Text-Shortcode

- ✓ Add your image source.
- ✓ Write link for the image.
- ✓ Write some text.
- ✓ You can write shortcode in the shortcode area.
- ✓ You can use it as many as you want

Rojo Image-Text-Shortcode: Text widget

Title: Text widget

**Delete | Close**

**Save**

### 3.2.8 Rojo Login/Registration

- ✓ Note: to let the user sign up you should go to **Settings > General** then check “**Anyone can register**”.
- ✓ Just drag it, no options in it.
- ✓ You can use it as many as you want.
- ✓

The screenshot shows the 'Settings' menu with 'General' selected. On the right, there's an 'E-mail Address' field containing 'email@creiden.com' with the placeholder 'This address is used for...'. Below it is a checkbox labeled 'Anyone can register' which is checked. At the bottom, there's a title input field 'Rojo Login/Registration: title dont' and a 'Save' button.

### 3.2.9 Rojo Socials

- ✓ Write the title of the widget.
- ✓ You have 8 input fields for the images source.
- ✓ You have 8 input fields for the links.
- ✓ You can use it as many as you want in the page.

The screenshot shows the 'Rojo Socials' settings panel on the left and its preview on the right. The settings include a 'Title' field with 'Socials', a 'First Link' field with '#1', and a 'First Image' field with a URL. The preview shows a red header with the word 'Socials' and a grid of social media icons: Facebook, Google+, LinkedIn, a blue square with a pencil, Pinterest, StumbleUpon, Tumblr, and Twitter.

### 3.2.10 Rojo Tabs

- ✓ This widget display your Recent, Popular, Latest comments in tabbed view.
- ✓ The Recent tab displays the latest posts according to date.
- ✓ The Popular tab displays the popular posts according to the number of comments.
- ✓ The Latest comments tab displays the latest comments on written on posts.
- ✓ You can write the count of posts you want to appear.
- ✓ Write the title of each tab.
- ✓ You can use it as many as you want in page.

### 3.2.13 Twitter widget

- ✓ First, you will need to update the Widget API Keys:
  - Open js/twitter/index.php
  - You will find these lines:

```
// Your Twitter App Consumer Key
private $consumer_key = 'PqQZZhBEtRebTKazfTnb9A';

// Your Twitter App Consumer Secret
private $consumer_secret = 'fsj0M7MFJcQueH9IH3zVNFvmbDpt8Pi3YbbUHH2xb28';

// Your Twitter App Access Token
private $user_token = '186950725-Bk8cSD5c2Vi2RH1aeraedE0jMvOonoDdKmTbPdOE';

// Your Twitter App Access Token Secret
private $user_secret = 'dFiNIXAGatvJeadCnjwvoaeqYoks2YQJwhbwxfG1Q10';
```

Change them with your API data from twitter APP from here: <https://dev.twitter.com/apps>

- ✓ Write title for the widget.
- ✓ Write your twitter name, example: "Creiden".
- ✓ You can use it only once at page.

The screenshot shows two parts. On the left is a 'Twitter Widget: Twitter' configuration dialog with fields for 'Title' (set to 'Twitter') and 'Twitter Username' (set to 'Creiden'). It also has 'Delete | Close' and 'Save' buttons. On the right is a sample Twitter feed showing three tweets from the user 'Creiden'. The first tweet is from 116 days ago, the second from 130 days ago, and the third from 156 days ago. The tweets promote items from themeforest.net.

Time Ago	Tweet Content
116 days ago	@odesk Our Financial Account has been suspended ticket ID 1594654, this is week number 3 and our business is having troubles with no reply
130 days ago	Check out this great #themeforest item 'Circle Flip PSD - Multipurpose Responsive Theme' <a href="http://themeforest.net/item/circle-fl...">themeforest.net/item/circle-fl...</a>

### 3.2.16 Contact form 7 widget

- ✓ First you should install “Contact Form 7 Widget”.

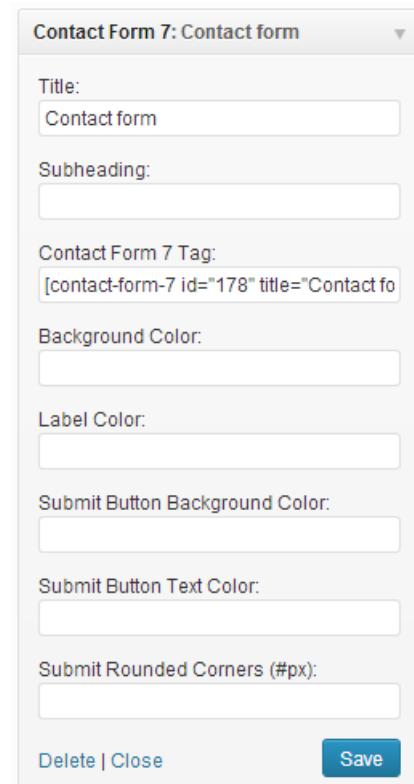

<http://wordpress.org/plugins/contact-form-7-widget/>

- ✓ Then you will find the widget available to drag.

- ✓ Write the title.

- ✓ Get your shortcode from contact form7 plugin and place it.

- ✓ You don't need to add the color or styling, you will find it styled.

## 4. Shortcodes

Rojo contains a lot of shortcodes that are easy to use here we will discuss them and how to use.

## 4.1 The page width divisions

#### **4.1.1 fullwidth shortcode**

[fullwidth]

## [paragraph]

Write text here.

[/paragraph]

[/fullwidth]

Nullam libero sem, pulvinar id pellentesque sit amet, blandit at enim. Nullam et libero nisi. Quisque ac felis quis felis tempus dapibus in faucibus libero. Phasellus ornare urna et lorem molestie blandit. In scelerisque mi feugiat dui dapibus a aliquet arcu blandit. Sed mi tellus, lacinia in adipiscing malesuada, egestas nec diam. Fusce mollis, purus tincidunt congue consequat, ipsum massa scelerisque mauris, ut sollicitudin leo nunc a nunc. Donec sed felis ut magna sodales vulputate.

#### 4.1.2 halfwidth shortcode

[fullwidth]

[halfwidth]

## [paragraph]

Write text here.

[/paragraph]

[/halfwidth]

[halfwidth]

## [paragraph]

Write text here

[/paragraph]

[/halfwidth]

Lore*m* ipsum dolor sit amet, consectetur adipisc*ing* elit. Phasellus lorem nunc, iacul*s* et porttitor non, tempus non lorem. Nullam libero sem, pulvinar id pellentesque sit amet, blandit at enim. Nullam et libero nisi. Quisque ac felis quis felis tempus dapibus in faucibus libero. Phasellus ornare urna et lorem molestie blandit. In scelerisque mi feugiat dui dapibus a aliquet arcu blandit. Sed mi tellus, lacinia in adipisc*ing* malesuada, egestas nec diam. Fusce mollis, purus tincidunt congue consequat, ipsum massa scelerisque mauris, ut sollicitudin leo nunc a nunc. Donec sed felis ut magna sodales vulputate.

Lore ipsum dolor sit amet, consectetur adipiscing elit. Phasellus lorem nunc, iaculis et porttitor non, tempus non lorem. Nullam libero sem, pulvinar id pellentesque sit amet, blandit at enim. Suspendisse felis quam, rutrum nec venenatis vitae, feugiat eget odio. Pellentesque fringilla nisi eget massa aliquam tincidunt suscipit enim suscipit. Fusce et vehicula massa. Donec at mi ut orci dapibus sollicitudin.

## The standard Lorem Ipsum passage, used since the 1500s

## 4.14 Progress bar shortcode

Just add the percent you want and you have 3 colors :red, blue and green.

```
[progressbar percent="60%" color="red"]
[progressbar percent="60%" color="blue"]
[progressbar percent="60%" color="green"]
```

## 4.15 Buttons shortcode

There are 4 types of buttons with many colors and many icons:

- ✓ 2 types are boxed : big , small
- ✓ 2 types are rounded big, small

### 4.15.1 Big squared button

```
[button link="#" color="red" icon="pin"
new_window="yes"]Submit[/button]
```

## 5. Creiden Sliders

We offer 7 great sliders trying to achieve all your needs with high quality and unlimited variety of options; in this section we are going to describe how you can use each slider.

### 5.1 Ultimate Slider

1-Go to Appearance >> Creiden Sliders >> Ultimate Slider

2- Choose how many slides you want to add, the delay between them and the height of the slider.

3- Go to the bottom of the page and save your changes, after saving your changes you will find the options of the slides appear at the bottom

116	fadeInDown	fadeOut	3	400

5. After saving the slide's option, the slide will appear:

The slide's items in the admin panel are draggable, which mean u can fix the items position by dragging it or change it manually from the slide option.

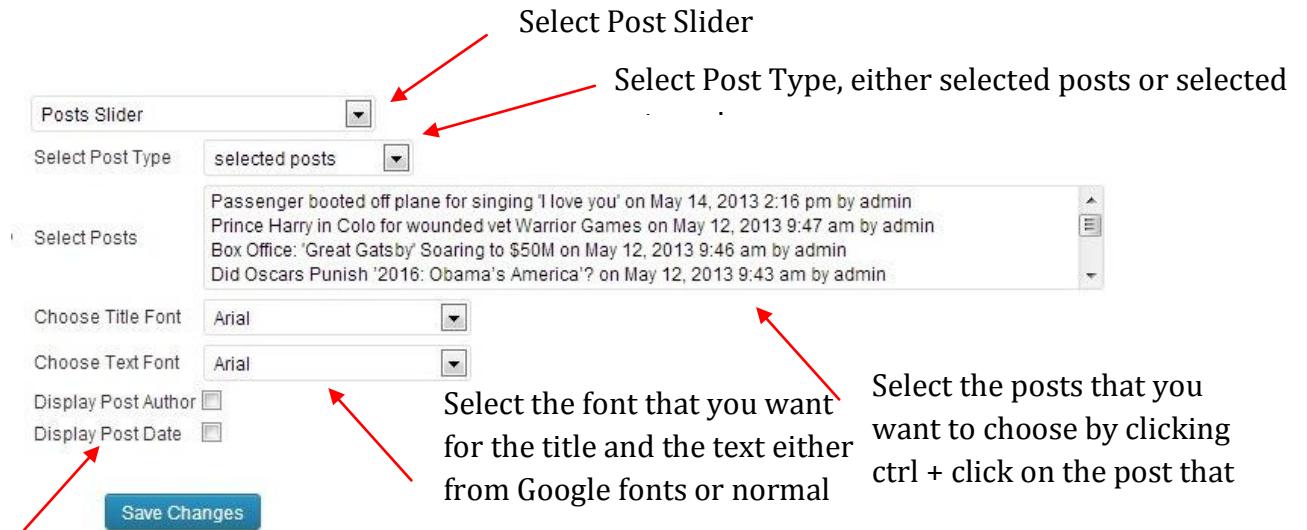

6. After Saving your Slider you can press on the "Animate Slide" button to see the slide works.

## 5.2 Posts Slider

The Posts Slider is used mainly to show a list of your posts in the form of a rotating carousel

If you have selected the posts slider you will find it like this:

Display the post Author and the post date

If you want to get the posts from certain category so you can choose selected Categories and then enter the number of posts and select the needed categories

This screenshot shows a configuration interface for selecting posts by category. It includes a text input field labeled "Enter Number of Posts" and a dropdown menu labeled "Select Posts Category". The dropdown menu contains four items: "Blog", "Business", "postwithimage", and "Uncategorized".

## 5.3 Elastic Slider

The Elastic slider gives you the opportunity to add your images with nice animation and also makes it available to add a title and a text

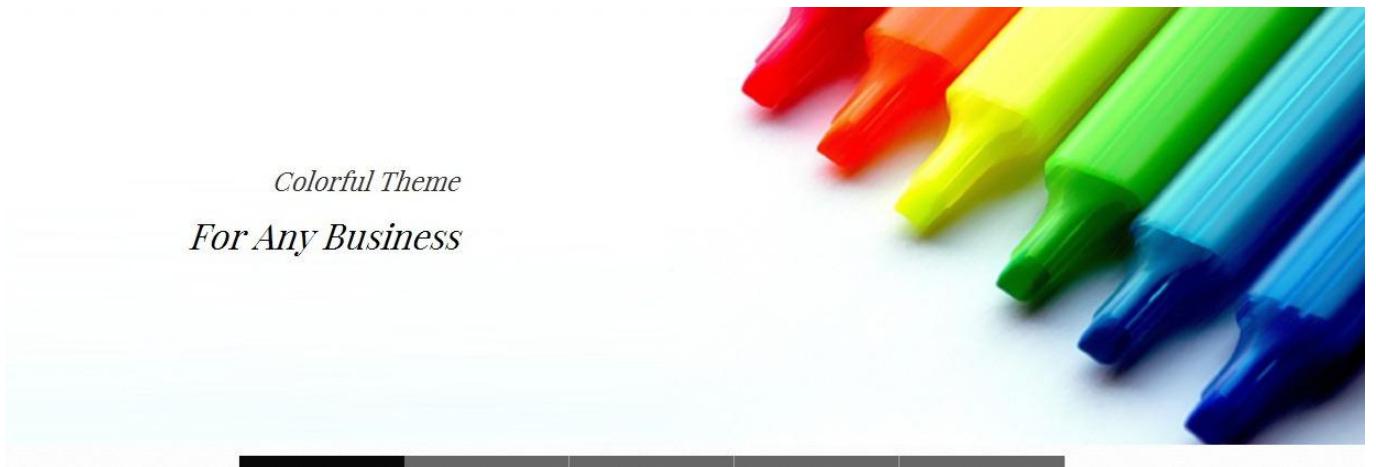

Here is a screenshot representing what we have:

Enter Number of Slides that you want and the height of the slider

Upload the image and the

You can enter the Title of the slide, Choose the font family needed and the font size and color and don't forget to enter a "#" before the Hex numbers.

The screenshot shows the 'Elastic Slider Settings Page'. At the top left is a dropdown menu set to 'Elastic Slider'. Below it is a section titled 'Elastic Slider Settings Page' with two input fields: 'Enter the Number of Slides:' containing '3' and 'Enter the height of Slider:' containing '400'. A red arrow points from the text 'Enter Number of Slides that you want and the height of the slider' to the 'Enter the height of Slider:' field. Below this is a large form area with two sections. The first section has 'Upload the Slide Image:' and 'Upload the Slide Thumbnail:' fields, each with an 'Upload Image' button. The second section contains four pairs of fields for slide titles and descriptions: 'Enter the Title of Slide:' and 'Font Family:' (set to Arial), 'Font Size:' (set to 10), and 'Font Color:' (empty); and 'Enter the Text of Slide:' and 'Font Family:' (set to Arial), 'Font Size:' (set to 10), and 'Font Color:' (empty). A red arrow points from the text 'Upload the image and the' to the 'Upload the Slide Image:' field. Another red arrow points from the text 'You can enter the Title of the slide, Choose the font family needed and the font size and color and don't forget to enter a "#" before the Hex numbers.' to the 'Enter the Title of Slide:' field.

## 5.4 Nivo, Flex, Responsive Sliders

This is an integrated plug-in Meta Slider; you don't have to install the plug-in to get it work as it is already implemented in Rojo.

To view the documentation you can go here:

<http://wordpress.org/extend/plugins/ml-slider/>

## 5.5 3D Slider

3D Slider is another posts slider with amazing 3D transitions

After that you will see a gallery tab appears, you have to go to it and Create a new gallery:

Select Post Type, either selected posts or selected

Select Post Type: selected posts

Enter Number of Posts:

Select Posts:

hufh on May 28, 2013 8:35 pm by admin  
post 10 on April 20, 2013 6:14 pm by admin  
post 9 on April 20, 2013 6:14 pm by admin  
post 8 on April 20, 2013 2:04 pm by admin

Choose Title Font: Arial

Save Changes

Select the posts that you want to choose by clicking ctrl + click on the post that

Select the font that you want for the title and the text either from Google fonts or normal

If you want to get the posts from certain category so you can choose selected Categories and then enter the number of posts and select the needed categories

Enter Number of Posts:

Select Posts Category:

Blog  
Business  
postwithimage  
Uncategorized

# 6. Pages

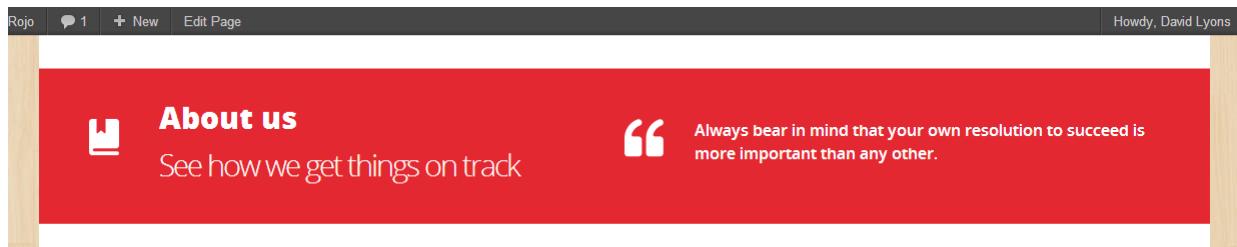

There are two types of pages, pages with Templates and pages made with the content builder; in this section we will discuss both.

## 6.1 About Us:

The About us page will tell you how to make a page with the content builder

### 6.1.1 About Intro:

The About Intro Bar has the following options: image icon, title, text and a quote.

### 6.1.2 About 2 Columns Part:

In this part we have two columns, the left column consists of a header with uploaded image and a text, after that a divider with 20 px and then the same as above again

The right column has 4 main parts: the heading and if you want to make the two parts like this please type this in the heading field:

*We are <span class="colored">hiring</span>.*

as you can see here you can add html, or shortcodes in the input field normally, the second part is the list block and here we have chosen the shape to be circle, the third part is text and the fourth one is normal button

## Our Vision

Cras bibendum quam et metus vulputate ac aliquet erat dictum. Suspendisse tincidunt nisl sit amet orci lacinia ac et est dui, ut adipiscing. Cras bibendum quam et metus vulputate ac aliquet erat dictum. Suspendisse tincidunt nisl sit amet orci lacinia ac et est dui, ut adipiscing. Cras bibendum quam et metus vulputate ac aliquet erat dictum. Suspendisse tincidunt nisl sit amet orci lacinia ac et est dui, ut adipiscing. Cras bibendum quam et metus vulputate ac aliquet erat dictum. Suspendisse tincidunt nisl sit amet orci lacinia ac et est dui, ut adipiscing.

## Our Mission

Cras bibendum quam et metus vulputate ac aliquet erat dictum. Suspendisse tincidunt nisl sit amet orci lacinia ac et est dui, ut adipiscing. Cras bibendum quam et metus vulputate ac aliquet erat dictum. Suspendisse tincidunt nisl sit amet orci lacinia ac et est dui, ut adipiscing. Cras bibendum quam et metus vulputate ac aliquet erat dictum. Suspendisse tincidunt nisl sit amet orci lacinia ac et est dui, ut adipiscing. Cras bibendum quam et metus vulputate ac aliquet erat dictum. Suspendisse tincidunt nisl sit amet orci lacinia ac et est dui, ut adipiscing.

## We are hiring.

- Lorem ipsum dolor sit amet.
- Aliquam tincidunt mauris eu risus.
- Lorem ipsum dolor sit amet.
- Lorem ipsum dolor sit amet.

Mauris mauris ante, blandit et, ultrices a, susceros. Nam mi. **Proin viverra leo ut odio.** Curabitur malesuada. Vestibulum a velit eu ante scelerisque.

**Apply Now**

### 6.1.3 Our Team Part:

This part consists of an image, text and social icons and author name

## Our Team

Suspendisse et nibh id orci dictum fringilla. Vivamus tortor purus, imperdierit non ultrices sit amet, convallis ac justo. Maecenas eu orci nulla. Vivamus aliquet, arcu vitae rhoncus egestas,

Suspendisse et nibh id orci dictum fringilla. Vivamus tortor purus, imperdierit non ultrices sit amet, convallis ac justo. Maecenas eu orci nulla. Vivamus aliquet, arcu vitae rhoncus egestas,

Suspendisse et nibh id orci dictum fringilla. Vivamus tortor purus, imperdierit non ultrices sit amet, convallis ac justo. Maecenas eu orci nulla. Vivamus aliquet, arcu vitae rhoncus egestas,

## 6.2 Contact page:

Rojo contact page is easy to create and edit everything in a few minutes.

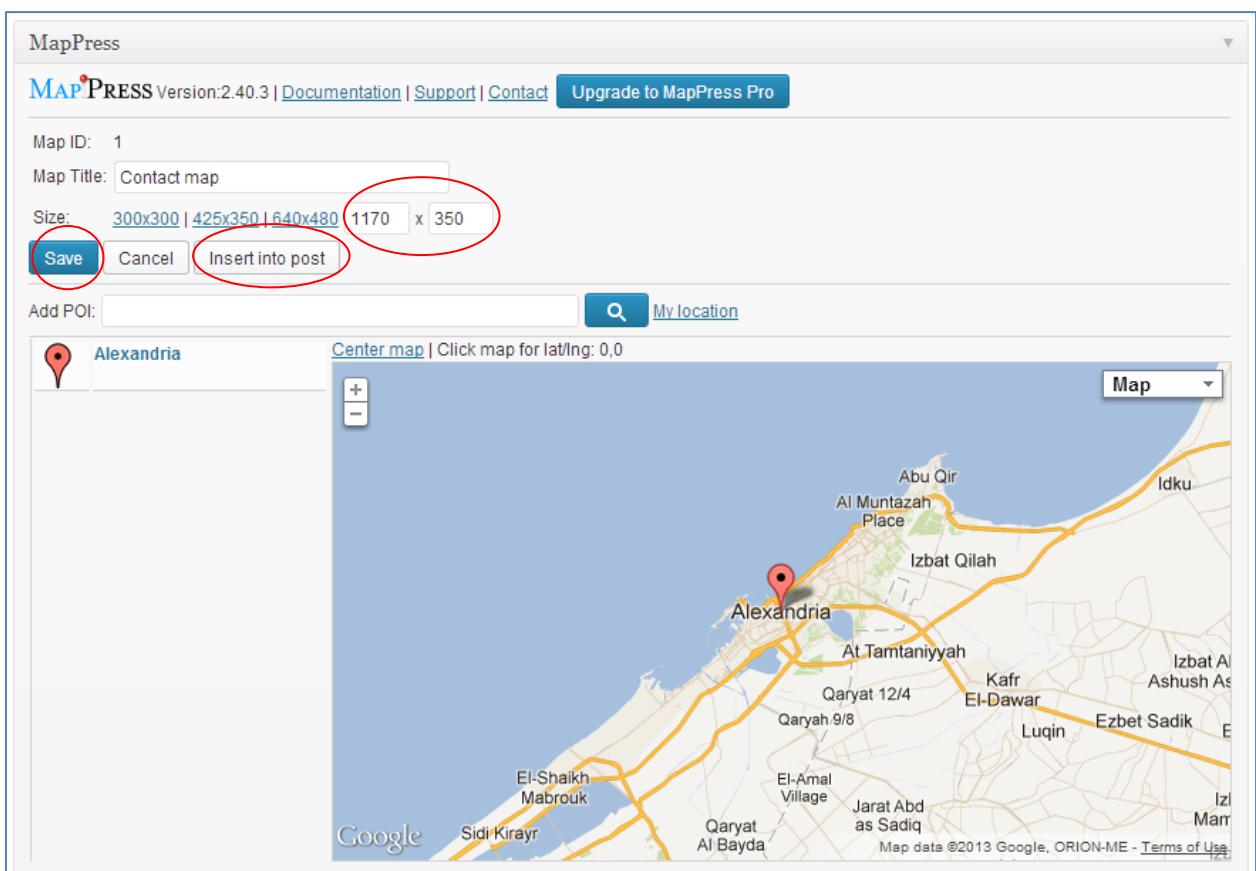

Follow these steps:

### 6.2.1 Create page:

Add new page with template “Contact page”.

### 6.2.2 Create map:

1. Go to plugins > Add New, and Install this plugin: “MapPress Easy Google Maps”.
2. To create the map, you will find at the bottom of post edit box “MapPress” section, create your map and save it.  
It's better to specify the width and height to: 1170 x 350.

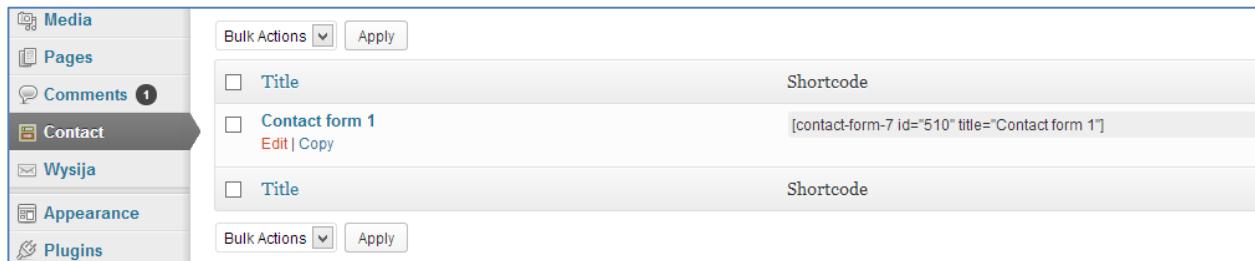

3. Then click insert into post, you will find the shortcode in the post edit box, cut this shortcode and add it to “[google map shortcode](#)” in Appearance > Theme Options > Contact Page tab.

Google Maps Shortcode	
[mappress mapid="1"]	
Enter the Shortcode Text of google maps	

### 6.2.3 Create Contact Form:

1. Go to plugins > Add New, and Install this plugin: "Contact From 7".
2. Then go to Contact tab, and edit contact form 1

The screenshot shows the WordPress admin sidebar on the left with various menu items: Media, Pages, Comments, Contact (which is highlighted with a grey arrow), Wysija, Appearance, and Plugins. The main content area displays a table with two rows. The first row has a checkbox labeled 'Title' and a column labeled 'Shortcode' containing '[contact-form-7 id="510" title="Contact form 1"]'. The second row also has a checkbox labeled 'Title' and a column labeled 'Shortcode'. At the top of the content area are 'Bulk Actions' and 'Apply' buttons.

Remove the <br> tags to be like this (copy these lines):

```
[text* your-name "NAME"][email* your-email "EMAIL"] [text your-subject  
"WEBSITE(OPT)"] [textarea your-message "MESSAGE"]  
[submit "Submit"]
```

3. Click save, and copy the appearing shortcode to Appearance > Theme Options > Contact tab. And write your title.

The screenshot shows the 'Contact form 1' edit screen. It includes a 'Copy | Delete' link at the top right. Below it is a text area containing the shortcode '[contact-form-7 id="510" title="Contact form 1"]'. A red circle highlights the 'Save' button at the bottom right of the text area.

The screenshot shows the 'Contact Form Title' and 'Contact Form Shortcode' input fields. The 'Contact Form Title' field contains the text 'THROW US A LETTER' and has a placeholder 'Enter the title of Contact Form'. The 'Contact Form Shortcode' field contains the shortcode '[contact-form-7 id="510" title="Contact form 1"]' and has a placeholder 'Enter the Shortcode Text of the contact form 7'. Both input fields are enclosed in red boxes.

## 6.2.4 Add Contact Information:

We blog from this cozy place in the middle of somewhere. ❤

Prof. John Doe  
Thing Rural 45  
X5187XAB San The Mall  
London

+1 (234) 567-8910  
email@website.com

1. Go to Appearance > Theme Options > Contact Page tab.
2. The contact bar part:

Contact Bar

Show the Contact Bar that contains the contact information  This enables or disable the part over the map with contact information.

Contact Bar Title

We blog from this cozy place in the middle of somewhere. ❤ Enter the Contact Bar Title This is the title

Contact Bar Info number

7 Enter the Number of contact info elements that you want to show in the contact bar Write how many contact info you need to create input fields, after you write the number click save, refresh page then scroll down again to see the input fields created for each info.

Upload Image for Contact Bar

http://rojo.creiden-themes.com/wp-content/uploads/2013/05/telephone.png Remove

Upload the contact bar info image viewed beside each element

Contact Bar Info Text

+1 (234) 567-8910 Enter the text of contact info element that you want to show in the contact bar

This is example for 1 info input fields:  
you have leave it description.

+1 (234) 567-8910  
input field for info image "you can empty" and another for info

### 6.2.5 Add Gallery Photos

1. Go to Appearance > Theme Options > Contact Page tab.

a. Side gallery part:

Side-Gallery Title

PHOTOS FROM OUR WORKPLACE Enter the title of the side-gallery

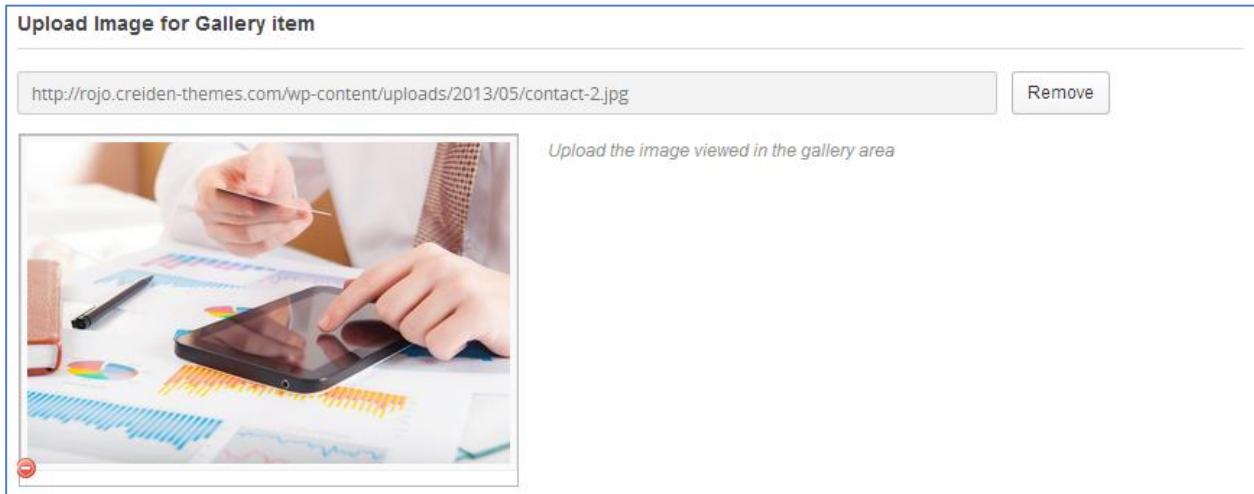

Number of gallery items

8 Enter the Number of gallery images that you want to show in the contact page

Write how many image you need to create input fields, after you write the number click save, refresh page then scroll down again to see the input fields created for each image.

**Note:** Please choose an image from your media not from external link in order to work properly and open in the prettyphoto, and choose big images.

Here is example for 1 image input field:

### 6.3 Pages Templates:

The Available pages templates are Sitemap, login & signup, Blog Page and you can choose them normally from the drop down menu of the pages templates of the Wordpress.

## 7. Load Speed Optimization

There are some plug-ins that can help your site to be faster that we will discuss in this section.

### 7.1 Better Wordpress Minify

In order to gain the best settings in this plugin you have to do the following:

a- make the One minify string will contain **100** files at most

b- Scripts to be minified in the header: jquery

c- Scripts to be minified in the footer:

colorpickerjs

configuratorjs

colorpicker

configuratorcss

uniform

super-rss-reader-js

site

jquery-ui

important

jquery-raty

d- Scripts to be minified and then printed separately: admin-bar

### 7.2 WP-HTML-Compression

This is used to Compress and minify the HTML that is sent to the server.

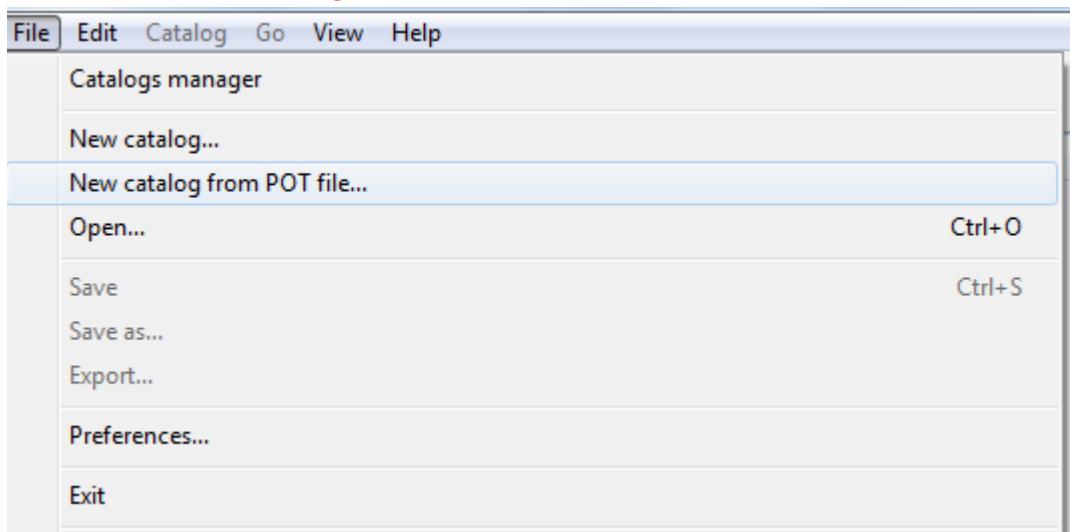

### 7.3 WP Super Cache

You just have to enable the caching and you are done

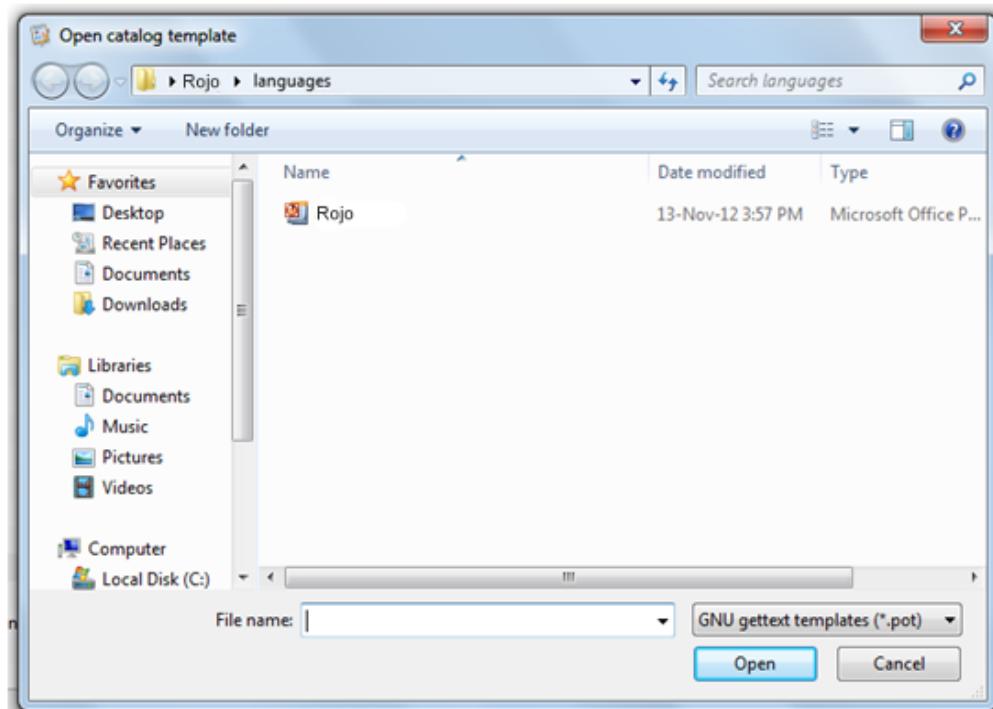

## 8. Translation:

Rojo is a translation ready theme, to translate your website follow the Steps below:

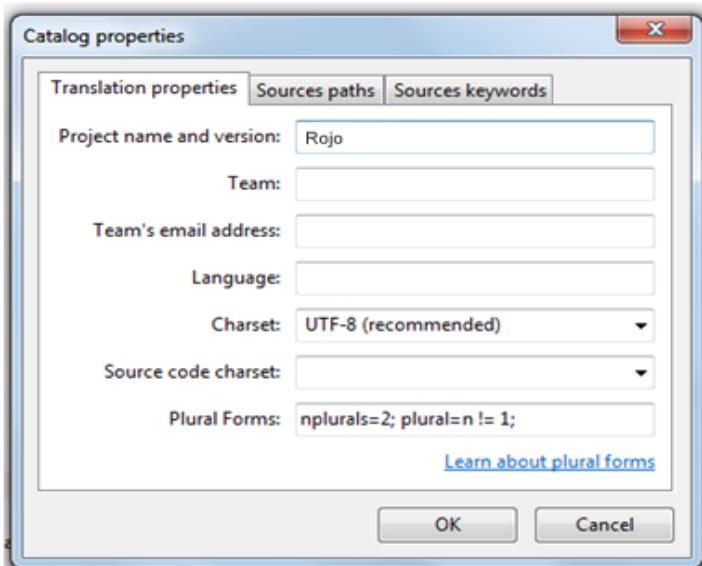

1. Download and Install Poedit from <http://www.poedit.net/download.php>
2. After installation open it
3. Go to file >> New Catalog from POT file

4. You will find Rojo.pot file in Rojo folder >> Languages
5. Choose rojo.pot and click open

6. fill the team name , email address and the Language and click ok

7. Write a file name but with a specific format (language code\_ country code )

For example for Spanish language you will write the file's name as es\_ES

To know the languages codes go to:

<http://www.gnu.org/software/gettext/manual/gettext.html#Language-Codes>

And for the country codes go to:

<http://www.gnu.org/software/gettext/manual/gettext.html#Country-Codes>

8. Choose each word and writes its translation

Notes for translators:

0 % translated, 88 strings (88 not translated)

- ## 9. After finishing all words click Save

10. Upload the (.po , .mo) files to your server in Rojo >> Languages

11. Open wp-config.php file you will find it in your wordpress root

12. Search for WPLANG and write your file name

```
/**  
 * WordPress Localized Language, defaults to English.  
 *  
 * Change this to localize WordPress. A corresponding MO file for the chosen  
 * language must be installed to wp-content/languages. For example, install  
 * de_DE.mo to wp-content/languages and set WPLANG to 'de_DE' to enable German  
 * language support.  
 */  
//define('WPLANG', '');  
define('WPLANG', 'es_ES');
```

13. Save the file and check your website

## 9. RTL:

Rojo is RTL-Supported Theme. We have included the Arabic .po files for you if you want to use them;

- 1- Open wp-config.php file you will find it in your wordpress root
- 2- Search for WPLANG and write your file name

```
/**  
 * WordPress Localized Language, defaults to English.  
 *  
 * Change this to localize WordPress. A corresponding MO file for the chosen  
 * language must be installed to wp-content/languages. For example, install  
 * de_DE.mo to wp-content/languages and set WPLANG to 'de_DE' to enable German  
 * language support.  
 */  
//define('WPLANG', '');  
define('WPLANG', 'es_ES');
```

- 3- Change this 'es\_ES' to 'ar\_EG'
